

Environmentally Critical Areas (ECA) Code and Policy Update Process

## **WE WANT TO HEAR FROM YOU!**

Click on the gray bars to respond.

If so, was the workshop informative?  Yes  No  Did you feel that your concerns were heard and/or recorded?  Yes  No  1. What is currently working well with the ECA regulations? What is not working as well?  2. What has been your experience with the ECA regulations (e.g., participated in the permit process, observed problems, etc.)? How have you been personally affected by the ECA regulations? I handle environmental permitting for Seattle City Light projects. Some of our right-of-way crosses critical areas. We need agreements about what we can and can't do in the way of routine maintenance on our right-of-way that does not involve getting a permit every time we need to cut down a tree. The ordinance has language in multiple places that seems to apply but is contradictory and unclear.  3. How can we improve protection of critical area functions and values while allowing reasonable development opportunities?  4. How can incentives for property owners enhance protection of environmentally critical areas? What incentives should be available for ECA protection?  (Optional) If you have questions about the Environmentally Critical Areas Update Process, please include your contact information:  Name Beth Blattenberger E-mail beth.blattenberger@seattle.gov Address Phone 386-4506  Zip  Please save an electronic copy of your completed form.  To return the form, attach the file to a new e-mail message addressed to Miles.Mayhew@seattle.gov *or* print the form and FAX it (206) 233-7883, ATTN: Miles Mayhew.	Did you attend the January 21 Code and Policy Update Workshop? ⊠ Yes ☐ No
